ADVANCES IN SECURITY INDUSTRY GIVE AREA BUSINESSES PEACE OF MIND

*Traditional Patrol Services Combine with High-Tech Electronics
To Secure Commercial Sites for SecurityPros Clients*

October 23, 2008 - Bend, Oregon – SecurityPros, the leading commercial security firm in Central Oregon (www.securityprosbend.com), announces its EVS service, which provides an added layer of comfort for commercial clients. EVS, or Electronic Verification System, is a high tech system which SecurityPros' patrol officers incorporate into their nightly patrol services. At every checkpoint on their routes, officers wave an electronic wand over installed memory buttons that record key information for both SecurityPros and the building owners. Time, date and location are recorded, verifying that the checkpoints have been visited the number of times agreed to by the clients' contracts.

Brian Shawver, President of SecurityPros, said, "Our EVS services provide us and our clients with the data we need to demonstrate to our clients that their building is being checked on throughout the night. This level of accountability is so far unmatched in the Central Oregon security market."

Unlike 'drive-by' security, between the hours of 6 pm and 6 am, seven nights per week, SecurityPros does thorough [patrolling](#) of its clients' facilities. At every checkpoint SecurityPros' officers use their reader wand to record the exact date and time each button was touched. They check that building doors and windows are secured, that no one is loitering on site, and notify police immediately of any problems, staying until released by police. Clients are only notified of serious problems.

Each morning, when SecurityPros' offices open, the [reports](#) are checked to see if any inconsistencies are reported. The system's customized computer software organizes the data into specific reports for each client. Because the system is tamper-proof, the data cannot be altered or manipulated, which provides the guarantee to facility owners that the patrol was conducted as promised. If any activity was noted, a report is then sent to the business owner, stating what occurred and what action was taken.

Jeff Behrens, Service Manager at Bob Thomas, said, "SecurityPros takes the personal approach to security services...they patrol as if it were their own property. The patrol reports and security suggestions are invaluable to us."

About SecurityPros

For 14 years, Bend-based SecurityPros Inc. has delivered professional physical security protection to an ever-growing base of Central Oregon commercial, industrial and governmental clients. The company currently protects more than \$1 billion of Central Oregon client assets. SecurityPros' services include providing more than 50 state-certified unarmed security officers in four specialty areas: nightly business patrol checks in Bend and Redmond, on-site posted officers at business locations, verified alarm response services and special event security services. For details, contact SecurityPros at 541-330-0404 or visit www.securityprosbend.com.
